

DV16 HIGH-SPEED INTERCEPTOR

The Interceptor DV16, boasting a maximum speed of 65 knots, represents the latest iteration of the CMN NAVAL sea-proven high-speed interceptor, the DV15. With over 100 units successfully delivered, it is a testament to high-performance craftsmanship, meticulously constructed from advanced composite materials, and carbon infusion. Its design is rooted in a Deep Vee planning hull, incorporating precise steps and spray rails for optimal functionality.

MAIN CHARACTERISTICS

•	Length Overall	16.9 m
•	Beam Overall	3.4 m
•	Maximum speed	65 Knots
•	Range at 50 Knots	250 NM
•	Crew	6
•	Embarked personnel	6
•	Fuel	2 m^3
•	Hull/Superstructure	Composite
•	Classification	DNV-GI

MISSIONS

- Maritime police and maritime security
- Fight against piracy, trafficking, smuggling and illegal immigration
- Protection of vulnerable vessels, harbour and offshore installations
- Combined operations with aircraft and coastal surveillance systems
- Sea strike operations
- Defence against asymmetric threats and speedboats
- Maritime counter-terrorism
